### DETAILED ACTION

1. This office action is responsive to communication filed on December 4, 2008. Claims 4, 5, 12, 14-23 and 25-38 are pending in the application and have been examined by the examiner.

#### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 4, 2008 has been entered.

#### ***Election/Restrictions***

3. A restriction requirement may be made at any time before final action (See 37 C.F.R. 1.142(a)). MPEP § 811 states that the examiner should make a proper requirement as early as possible in the prosecution, in the first action if possible, **otherwise, as soon as the need for a proper requirement develops**. Before making a restriction requirement after the first action on the merits, the examiner will consider whether there will be a serious burden if restriction is not required.

4. The examiner has found that the claims of the invention are now so substantially developed through amendment that two distinct inventions are clearly defined. Due to the unique nature of the separate claimed inventions, a serious search burden has been placed on the examiner. For instance, prior art pertinent to one invention would most

likely not be pertinent to the other. Thus, Applicant is required to elect one of the claimed inventions.

5. This application contains claims directed to the following patentably distinct species:

Species I (figures 2 and 3, claims 4, 12, 14, 16, 17, 20, 22, 25-27 and 31-34)

Species II (figures 4 and 5, claims 5, 15, 18, 19, 21, 23, 28-30 and 35-38)

Species III (figures 7 and 8)

Species IV (figure 9)

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. **Currently, no claims are generic.**

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that a reply to this requirement must include an (i) an election of the species to be examined** even though the requirement may be

traversed (37 CFR 1.143) and (ii) **identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of species may be made with or without traverse. To preserve the right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the elections, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.  
MPEP § 809.02(a).
